

Coronavirus in Royal Family

Prince Charles is the **eldest** son of Queen Elizabeth II.

He is 71 years old.

He is the future King of the United Kingdom.

Prince Charles is ill.

He has the coronavirus.

His illness is not very strong.

He does not have other health problems.

His wife, Camilla, is healthy.

Charles and Camilla are in Scotland now.

They stay in **quarantine**.

It is not clear when Charles becomes ill.

He meets a lot of people.

In the United Kingdom, there are 11 600 **cases** of coronavirus.

Almost 600 people die.

It is not safe for the Queen to stay in London.

The Queen is 93 years old.

She is healthy.

She leaves London.

She stays at Windsor Castle.

Difficult words: **eldest** (the oldest in a family), **quarantine** (when people stay at home, and they do not meet other people), **case** (one example of something).
